REPORT  
OF THE  
INSPECTORS OF IRISH FISHERIES  
ON THE  
SEA AND INLAND FISHERIES OF IRELAND,  
FOR 1897.

---

TO HIS EXCELLENCY THE RIGHT HONOURABLE  
GEORGE HENRY, EARL CADOGAN, K.G., K.P., P.C.,  
&c., &c., &c.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,

We have the honour, in conformity with section 112 of the Act 5 and 6 Vic., cap. 106, to submit our Report for the year 1897, being the 29th since the Sea and Inland Fisheries of Ireland were placed under the superintendence of this Department.

---

THE SEA FISHERIES.

*Vessels, Men, and Boys.*

We find that 6,626 vessels and boats were actually engaged in the Sea Fisheries in 1897, as compared with 6,553 in 1896. This shows an increase of 73. There were increases of 11 in the 1st class, 16 in the 2nd, and 46 in the 3rd class boats.

There were 24,593 men and 1,126 boys employed, showing an increase on the previous year of 596 men and a decrease of 41 boys. Of the vessels 391 were first class, 2,857 second class, and 3,378 third class.

The trawling industry pursued by the Ringsend (Dublin) men was not so successful of late years, and this led to a decrease in the number of first class boats worked from that Port. The operations of steam trawlers outside territorial waters are said to have partly accounted for this state of things.

The successful herring fishing off the County Donegal Coast caused the men in the neighbourhood to obtain about 70 new boats (2nd and 3rd class).

The Coast-guard Officer at Costello Bay (County Galway) was asked the cause of the decline in the number of boats fishing off his station in 1897, and he gave the following reply:—

"I most respectfully beg to state that some of the boats are worn out, and the owners are too poor to get new ones. Others find that fishing does not pay as well as trading in turf pays. Any young man that has a boat would be glad to sell her if he could, and go to America."

Beam trawling was carried on by 989 men and 39 boys in 3 steam, and 256 sailing vessels. Of these 122 were under 10 tons, 31 between 10 and 20 tons, 26 between 20 and 30 tons, 24 between 30 and 40 tons, 46 between 40 and 50 tons, and 10 over 50 tons. (See also Appendix No. 8, p. 58.)

Otter trawling was carried on by 1,094 men and boys in 34 first-class, 265 second-class, and 34 third-class vessels. (See also Appendix No. 9, p. 64.)

Fishing by long lines in 1897 was carried on by 8,207 men and 122 boys in 57 first-class, 1,072 second-class, and 1,069 third-class boats. (See also Appendix No. 10, p. 66.)

About 784 persons were engaged gathering oysters off the public beds.

Nearly 4,000 persons were engaged at the lobster, and about 1,200 at the crab fisheries.

About 700 were engaged picking mussels, about 250 cockles, and nearly 4,400 in gathering periwinkles.

Details are given in the Appendices.

For the number of boats engaged in the mackerel fisheries see pages 8 and 9.

There were 41 first class, 394 second class, and 393 third class boats that did not fish during the year. The reasons given are similar to those of previous years, namely:—"No crew;" "laid up;" "owner employed otherwise;" "used for pleasure;" "not in repair," "in carrying trade;" "tender to lightship;" "broken up, registers cancelled during year;" "gave up fishing;" "no gear;" "crew in other boats."

Fourteen first class boats from Arklow and one second class boat from Annalong attended the Scotch Herring Fishery.

### *Loans.*

We received during the year 148 applications from 174 persons for loans amounting to £4,659 15s. 10d. Of these we recommended 121 to 138 persons, to the amount of £3,955 1s. 10d. The sum actually issued during the year by the Board of Works was £4,041 19s. 10d., which of course included some loans recommended during the previous year.

Of the £20,000 reserved by the Purchase of Land and Congested Districts (Ireland) Act, 1891, for administration by us in non-congested districts, the sum of £18,885 0s. 6d. was advanced

up to the 31st December, 1897. The promissory notes signed to secure principal and interest amounted to £20,468 10s. 6d. The repayments were £9,522 6s. 1d.; the outstanding notes not arrived at maturity, £10,747 16s. 6d. The arrears on the £20,468 10s. 6d. consisted of £198 7s. 11d., of which £51 9s. is considered irrecoverable.

Amongst the larger loans recommended by us were the following:—

County Antrim, loan of £65 for purchasing a smack.

County Cork, loans of £100 and £120 for repairing boats and purchasing gear; £50 for purchasing a smack; and £100 for purchasing gear.

County Donegal, loan of £100 for purchasing a smack.

County Down, loan of £40 for building a boat and purchasing gear.

County Dublin, loan of £280 for purchasing a boat.

County Galway, loans of £250 for purchasing a trawler, and repairing a boat; £200 and £165 for purchasing trawlers; and £200 for purchasing a smack.

County Kerry, loans of £450 and £500 for purchasing smacks; and £40 for erecting a curing house at Brandon.

County Londonderry, loans of £60, £40, and £50 for building boats; £40 for purchasing boat and nets; and £50 for building a boat and purchasing gear.

County Wicklow, loan of £100 for fitting steam winch on "Mystical Rose."

Further particulars in connection with these loan transactions will be found in Appendix, No. 19, pages 92-95.

### *Piers and Harbours.*

In our Report for the year 1894 we gave a return relating to works under the Sea Fisheries (Ireland) Act, 1883 (46 and 47 Viet., c. 26), up to the 31st March, 1895. In 1897-98 general engineering expenses amounting to £376 18s. 11d. were incurred.

### *Quantity of Fish Landed.*

According to the returns we have received from those places around Ireland from which we have been able to obtain information, the total value of the sea fish (including shell-fish, but excluding salmon), landed in Ireland in 1897 was £378,385 as compared with £368,805 in 1896—an increase of £9,580.

We have not statistics of the total amount of salmon captured, but it is estimated that the value of the quantity exported to nine of the principal English markets was £452,440.

Of the pollen caught in Lough Neagh that exported is estimated to value £6,344.

For our review of the Statistics of Sea Fish see page 10.

*The Spring Mackerel Fishery.*

The spring mackerel fishing of 1897 shows a slight improvement on that of the previous year, although for the fishermen it was in many ways unsatisfactory. Nearly the whole of April was so stormy that little fishing could be attempted. The more daring or more lucky crews, during this period, who succeeded in making hauls of fish, did well, owing to the high prices which ruled in consequence of the scarcity. Fine weather began with the month of May, and hauls of fish were made off the coast of the County Cork which far exceeded anything that has been experienced of late years. Captures of from 10,000 to 19,000 per boat were made in the first week of May. Whether these great takes were in consequence of the shoals of fish having become more dense owing to their having been so little disturbed in the month of April, or whether they point to a great increase of mackerel on the coast, it is impossible to say. In consequence of these immense takes there was a general fall of about 50 per cent. in the market prices, which made but a small recovery during the remainder of the season.

The largest capture was at Castletown Bere, where £17,581 was paid for the mackerel, but at Kinsale, while the number captured was less, the cash value was nearly £1,000 more.

Baltimore occupied third place, and at Crookhaven a good fishing was made by the Manx boats assembled there.

The total number of boats attending the spring mackerel fishing shows a decline, the falling off being particularly noticeable in the case of those coming from the Isle of Man, which in the last three years has fallen from 218 to 177. There has also been fewer from the East coast of Ireland. This may be attributed in part to the shortening of the mackerel season which has, as referred to in our Report for 1895, for some unexplained cause, been beginning later every year. The decline is also, no doubt, due to the failure of the East coast herring fishing, a number of men having, in consequence, given up fishing and gone off into other employments.

French boats, with crews varying from 16 to 25 men and boys, as usual took part in the season's mackerel fishing on the Irish coast, landing their takes in France. According to reports from Dieppe, Fecamp and Boulogne, it would appear that the amount of the capture of these boats for the season was 57,666 cwts. These figures do not, of course, appear in our statistics.

The following are the numbers of Irish boats engaged in the Spring mackerel fishery, in 1897:—

Irish, 1st Class,	.	.	.	.	206
„ 2nd „	.	.	.	.	114
„ 3rd „	.	.	.	.	718

### *The Autumn Mackerel Fishery.*

The amount of mackerel captured during the autumn of 1897, was 12,951 tons, and shows a decline of 5,291 tons on the previous year's take; which however was much the largest on record. The loss in money value to the country shown by this comparison was £6,880. While this unsatisfactory aspect of the matter has to be stated, it is well to see that a great increase occurred in some places, notably in Kinsale, where £27,521 was received in 1897, compared with only £7,679 in the previous year. A large portion of this sum was received for fish despatched fresh to the English markets. This fresh fish trade is a comparatively recent development of the autumn mackerel fishery.

This great gain however at Kinsale throws the weight of the loss on other districts, and this was felt heaviest in those fishing stations in West Cork and Kerry which are situated on both sides of the mouth of the Kenmare river, from Dursey Head to Ballinskelligs. In this limited district the capture was 2,976 tons short of the previous year, and the money paid to the local fishermen was £13,247 less.

A cursory glance at these figures might lead to the conclusion that an alarming decline in the amount of fish took place. This however does not appear to have been the case; but from some unexplained cause the fish did not school on the surface of the water as usual, and, consequently, could not be captured in the seine nets which are largely used in this locality. A similar falling off, and from the same cause, but to a smaller extent, is noticeable in Dunmanus Bay, also at Valentia, but there the higher prices for the fish taken by drift nets prevented the loss from being so serious. In districts where no seining was tried and where drift nets only were used there is nowhere a sign of serious decline.

The amount of barrels cured for the American market was only 48,352, compared with 75,375 in 1896, but nearly the whole of the difference between the output of the curing stations for the two seasons would be accounted for by the failure of the seining in Cork and Kerry above referred to, and to the fact that from other places a larger proportion of the fish was sent fresh to England.

The following are the numbers of Irish boats attending this fishery in 1897:—

Irish, 1st Class,	.	.	.	.	140
" 2nd "	.	.	.	.	314

### *The Herring Fishery.*

It is satisfactory to note, in reviewing the herring fishing of the past year, that the great increase in the capture referred to in our last Report has not only been maintained, but has advanced considerably. The increase is, however, altogether confined to the Autumn fishery; the spring fishery, which is chiefly prosecuted by Scottish boats on the South coast, shows a slight decline.

The total take for the year 1897 was 14,383 tons, compared with 12,216 tons in 1896, and 8,563 tons in 1895. But the value of the take, instead of showing an increase, shows a decline to £61,602 in 1897 from £63,092 in 1896. This can partly be accounted for by the bulk of the increase in the capture having taken place in those places, such as on the Donegal coast and in Galway, where prices were low; and a great falling off in the capture in some of the East Coast ports where prices are usually higher.

The North coast, which includes only Donegal, showed a remarkable advance in the take of herrings, the figures being 4,500 tons in 1897, and 2,900 tons in 1896, but the value shows no proportional advance, £17,775 having been paid in 1897 compared with £15,703 in 1896.

The great increase in the capture in this section was no doubt in great part due to the fleet of herring boats provided for local crews by the Congested Districts Board having fished in Sheep-haven during the past season for the first time.

At Dunmore East, where a large number of Arklow boats fished, the value was not at all in proportion to the increased take. Whatever may have caused greater captures locally, there can be no reason to doubt but that a great and general increase in the amount of herrings visiting our shores is taking place along the whole North-west, West and South coasts.

These West coast herrings being of splendid quality there is every reason to expect improvement in price when the out-put of the fishing becomes recognized by the trade.

### *Review of Statistics of Fish (excluding Salmon) Landed.*

According to the returns we have received from those places around Ireland from which we have been able to obtain information, the total quantity of sea fish (other than shell-fish) captured in 1897, was 950,198 cwts., valued at £317,017. In 1896 the corresponding figures were 1,013,692 cwts., and £319,207. The former therefore shows decreases of 63,494 cwts., and £2,190.

The following figures will show at a glance a comparison of the takes on the different coasts during the two years:—

The average price per cwt in 1897 was about 6s. 8d. as compared with 6s. 3½d. in the previous year.

Including shell-fish, the total value for 1897 was £378,385, and for 1896 £368,805.

*Turbot*.—The total capture in 1897 was 1,689 cwts., valued at £5,428, as compared with 992 cwts., value £3,356, in 1896.

The average price in 1897 was about £3 4s. 3d. per cwt., and in 1896, £3 7s. 8d. per cwt.

*Soles*.—The total capture of soles in 1897 was 2,113 cwts., valued at £7,150, as compared with 1,890 cwts., valued at £6,719, in 1896.

The average price in 1897 was about £3 7s. 8d. per cwt., and in 1896, £3 11s. 1d. per cwt.

*Herrings*.—The total capture of herrings in 1897 was 287,678, cwts., valued at £61,602.

In the previous year the total capture was 244,328 cwts., and the total value £63,092.

The average price in 1897 was about 4s. 3d. per cwt., and in 1896, 5s. 2d. per cwt.

*Cod*.—The total capture of cod in 1897 was 47,263 cwts., valued at £18,665, as compared with 42,047 cwts., valued at £18,415, in 1896.

The average price per cwt. in 1897 was about 7s. 11d., and in 1896, 8s. 9d.

*Ling*.—The total capture of ling in 1897 was 17,738 cwts., valued at £6,961, as compared with 19,561 cwts., valued at £7,492, in 1896.

The average price per cwt. in 1897 was about 7s. 10d., and in 1896 about 7s. 8d.

*Haddock*.—The total capture of haddock in 1897 was 28,173 cwts., valued at £15,715.

In the previous year the total capture was 31,574 cwts., and the total value £18,560.

The average price in 1897 was about 11s. 2d. per cwt., and in 1896, 11s. 9d.

*Whiting.*—The total capture of whiting in 1897 was 9,396 cwts., valued at £4,715, as compared with 13,186 cwts., valued at £6,640, in 1896.

The average price per cwt. in 1897 was about 10s. 0d., and in 1896, 10s. 1d.

*Sprats.*—The total capture of sprats in 1897 was 3,675 cwts., valued at £363.

In the previous year the total capture was 1,221 cwts., valued at £153.

The average price per cwt. in 1897 was about 2s. 0d., and in 1896, 2s. 6d.

*Mackerel.*—The total capture of mackerel in 1897 was 477,953 cwts., valued at £162,234.

In the previous year the total capture was 582,772 cwts., valued at £159,921.

The average price per cwt. in 1897 was about 6s. 10d., and in 1896, 5s. 6d.

*Hake.*—The total capture of hake in 1897 was 20,343 cwts., valued at £8,184 as compared with 26,066 cwts., valued at £10,214, in 1896.

The average price per cwt. in 1897 was about 8s. 1d., and in 1896, 7s. 10d.

*Other kinds (not shell fish).*—The total capture in 1897 was 54,177 cwts., valued at £26,000, as compared with 50,055 cwts., valued at £24,645, in 1896.

The average price per cwt. in 1897 was about 9s. 7d., and in 1896, 8s. 11½d.

### *Shell Fish.*

*Oysters.*—We estimate that about 13,147 hundreds of oysters were taken off the public beds in 1897, and that the value thereof was £4,031.

From the private beds, so far as we have been able to obtain returns, about 17,881 hundreds of oysters were lifted. The value of these is estimated at £4,163.

See also Appendices No. 14, page 83, and No. 23, page 124.

*Lobsters.*—We estimate that about 92,699 dozens of lobsters were captured in 1897, and that their value was £39,112. See also Appendix No. 11, p. 74.

*Crabs.*—We estimate that about 36,265 dozens of crabs were taken in 1897, and that their value was about £2,952. See also Appendix No. 12, p. 78.

*Mussels.*—We estimate that the weight of the mussels taken this year was about 2,539 tons, and that the value thereof was about £2,595. See also Appendix No. 15, p. 86.

*Cockles.*—We estimate that about 71,453 gallons of cockles were picked in 1897, and that their value was about £2,367. See also Appendix No. 16, p. 87.

*Periwinkles.*—We estimate that the weight of periwinkles taken this year was somewhere about 1,593 tons, and that the value thereof was £6,076. See also Appendix No. 17, p. 88.

*Shrimps.*—Shrimping is not largely followed around the Irish coast. The cases mentioned in Appendix No. 13, page 82, are the only ones in which the coastguards have reported that shrimps have been taken. We estimate the value at about £71.

The total value of the shell fish as furnished in the returns for 1897 is estimated at £61,368, as against £49,598 in 1896.

See Appendix No. 1, p. 40.

### *Casualties.*

It is to be regretted that the casualties to fishermen on the Irish Coast for the year ending 30th September, 1897, were in excess of those for many years past.

The number of men who lost their lives while actually in pursuit of their calling was twelve, as compared with ten for the previous year. The number who lost their lives while conveying sea-weed, provisions, materials, &c., and when engaged in other work not immediately connected with fishing, was thirteen, as compared with six in the previous year, and in one case the wife of a fisherman was also drowned.

The boats also suffered much more severely. The number of first-class boats lost was seven, of second-class thirty-seven, and of third-class sixty, as compared with two, six, and eight, respectively. The greater portion of this loss was caused by the heavy gales which occurred about the 7th or 8th October, 1896. Three third-class boats were also destroyed when not actually engaged in fishing.

The following are the particulars of the casualties as furnished by the Coast Guard Officers at the various stations:—

From Ringsend Station.—One fisherman when dropping the trawl of the vessel, "Knight Commander," of Dublin, on 17th May, 1897, was hauled overboard by the trawl and drowned. The "Liffey," a first-class boat, was wrecked on the East Pier, Kingstown, in May, 1897, and a second-class boat, the "Thomas," collided with one of the perches in the river and became a total wreck.

From Kingstown Station.—The second-class boat "Norway" was washed ashore and damaged during the storm of the 8th October, 1896, but was subsequently repaired.

From Kilmore Station.—Eight second-class boats were totally lost, and five were seriously injured by being swamped at their mooring at Kilmore Quay, during the same storm.

From Dunmore East Station.—Two first-class boats were

driven from their moorings and totally wrecked by the gale of the 7th October, 1896, and two second-class boats were badly damaged.

From *Tramore Station*.—Two second-class boats were broken up by the storm on the 8th October, 1896, while hauled up on the beach.

From *Bonmahon Station*.—Two third-class boats were swept off the beach during the same storm.

From *Ardmore Station*.—Three second and four third-class boats were totally destroyed during the heavy gales of October, 1896.

From *Ballycottin Station*.—One man was drowned on the morning of the 29th May, 1897. He went out alone to lift his lobster pots while a fresh breeze was blowing, and was not again seen although searched for by the life-boat's crew. His own boat was afterwards seen floating bottom up—but she became a total wreck.

From *Poor Head Station*.—One second-class boat and three third-class boats were broken up on the beach at Guileen, by the storm of the 8th October, 1896.

From *Upper Cove (Kinsale) Station*.—On the 3rd May, three men belonging to the "*Exquisite*" were drowned while going off to their vessel, and on the 6th June, 1897, the skipper of the fishing boat "*Vigilant*" was killed by falling from a cliff.

From *Howestrand Station*.—Three third-class boats were totally destroyed by the storm of the 8th October, 1896.

From *Dunny Cove Station*.—One second-class boat and three third-class boats were destroyed by the same storm.

From *Union Hall Station*.—The first-class fishing boat "*Annie*" was lost in a fog on 26th August, 1897, between Brass Rock and High Island. The crew were saved.

From *Castletownsend Station*.—One man was drowned on 14th November, 1896, while crossing from Castletownsend to his home in Myross.

From *Ballyalley Station*.—Two third-class boats were completely broken up by the storm of the 7th October, 1896.

From *Baltimore Station*.—During the same storm, two lobster smacks, each of about 50 tons register, were blown from their anchorage and totally wrecked on the rocks in Baltimore Harbour. On the same night a second-class boat belonging to Sherkin Island was blown from her moorings and totally wrecked.

From *Schull Station*.—One first-class boat, four second, and one third, broke from their moorings on the 8th October, 1896, and became total wrecks.

From *Crookhaven Station*.—One second-class boat, which had been hauled up on the beach at Ballyrizzard, was badly damaged on the 7th October, 1896. She has not been repaired since.

From Castletownbere Station.—Six second and twelve third-class boats were swept away and wrecked on the 8th October, 1896.

From Lawrence Cove Station.—One second, and one third-class boats were totally wrecked by the storm of the 7th October, 1896.

From Ballinskelligs Station.—Eleven third-class boats were either washed away or completely broken on the same date, and nine others were seriously damaged, but were subsequently repaired.

From Dingle Station.—One third-class boat was carried away by the storm of the same date, and was totally wrecked.

From Ventry Station.—Seven third-class boats were totally wrecked on 7th October, 1896.

From Smerwick Station.—Two men lost their lives on the 5th July, 1897, while engaged in lifting their lobster pots off Illaungib Rocks—their boat (third-class) was wrecked. One third-class boat, together with her train of nets, was lost in Brandon Creek, in the latter part of July, 1897. Her crew were saved.

From Cappa Station.—In the early part of the night of the 22nd February, 1897, a fisherman, his son, and wife were drowned while crossing from Cappa Pier to their home on Scattery Island, with provisions. The cause of the disaster is not known, but it is thought that their boat was overladen.

From Spiddle Station.—One third-class boat was broken up on the beach by the storm of 8th October, 1896.

From Cleggan Station.—Six third-class boats were washed away and totally destroyed by the same storm.

From Rosmoney Station.—One third-class boat was floated off the beach by a high tide on the morning of the 25th September, 1897, and became a total wreck; and one was lost in March, 1897, while the crew were gathering sea-weed.

From Belderrig Station.—Two fishermen were drowned by the upsetting of their curragh on the 28th October, 1896, the remainder of the crew were saved by another boat.

From Raghley Station.—One third-class boat while gathering sea-weed on 28th April, 1897, was damaged beyond repair by being bumped upon the rocks—the sea having risen during the process of loading.

From Bunbeg Station.—Two fishermen were drowned by the capsizing of the fishing boat "Mary" in a squall on the 2nd May, 1897.

From Moville Station.—One second-class boat was lost in the storm of the 7th October, 1896; one was sunk by collision with a Portstewart boat on 29th April, 1897, and one went down at her moorings during a gale which occurred early in September. Three second-class boats which had been hauled up on the beach were damaged beyond repair by a gale which occurred about the 6th March, 1897.

From Portrush Station.—Three second-class boats were broken up in Portrush Harbour during the storms of the 8th October, 1896, and one was sunk by collision with the Merville boat above mentioned, on the 29th April, 1897. The crews of both boats were saved.

From Larne Harbour Station.—One second-class vessel—the “Mary Ellen”—was wrecked on the Maiden’s Rock, on the 16th June, 1897. No lives were lost.

From Dunany Point Station.—The fishing boat “Irish Chieftain,” of Annagassan, was caught in a squall and swamped while fishing off Carlingford Bar, on the 16th March, 1897. Her crew of six men were drowned. The boat was subsequently recovered.

## SALMON FISHERIES.

### *General Observations.*

The year 1897 was a bad one as regards the salmon fisheries of Ireland. In this respect we participated in the failure that took place generally throughout the United Kingdom. It is probable, however, that we came off proportionately better than either England or Scotland. The export from Ireland to the principal English markets amounted to 55,685 boxes (of 150 lbs. each), showing a decrease of 5,658 boxes on the previous year’s export. According to returns kindly furnished to us by the Fishmongers’ Company of London, the English salmon sold in 1897 at Billingsgate was less by 212 boxes, and the Scotch less by 6,151 boxes, than in the preceding year. These figures are sufficient to show that there was a general falling off in the capture of salmon in the season under review. It is difficult to assign definitely a cause to this. It cannot be assumed that a decrease in the take always indicates a falling off in the stock of a river. There is, however, no doubt that the present knowledge of the life history of the salmon is not sufficient, and that ignorance exists as to the local conditions that possibly affect the movements of the fish. Extended experiments are desirable in this direction. Funds are of course necessary, and we think it a case for a yearly grant of money out of the public purse. The subject has more than once engaged the attention of persons interested in the fisheries, but it cannot be expected that private individuals, no matter how considerable their interests are, will undertake the expense of such investigations.

The different Boards of Conservators have furnished reports as to the general state of the salmon fisheries in their districts, of which the following is the substance:—Dublin, “not good, declining”; Wexford, “improving”; Waterford, “fair, improving”; Lismore, “poor, capture this year considerably below average”; Cork, “fair, improving”; Bandon, “about the same”; Skibbereen, “a very small improvement”; Bantry, “bad, declining”;

Kenmare, "fair, but declining as compared with last year"; Killarney, "very unproductive during 1897, fair up to last season"; Limerick, "a very unsatisfactory season"; Galway, "fair"; Connemara, "good and improving"; Ballinakill, "not as good as in previous year"; Bangor, "fair, but declining"; Ballina, "poor, but not declining"; Sligo, "declining"; Ballyshannon, "declined very much"; Letterkenny, "fairly good, improving"; Londonderry, "not declining generally, but 1897 a bad year"; Coleraine, "declining"; Dundalk, "fair"; and Drogheda, "declining."

The run of grilse was unusually late in the Waterford district this year. Fish also came later in the Skibbereen district.

The reports as to angling, as will be seen on reference to Appendix No 33, page 186, differ greatly in character, but on the whole we think they are more favourable than those of 1896.

There is practically no salmon disease in Ireland. In the Bush River, where alone it has maintained its hold, there was very little in 1897.

We are glad to say that the offence of poisoning rivers, with intent to take fish, was not generally committed in 1897. Lime and spurge were used in a few cases. Flax water pollution, however, took place in the North of Ireland. It is impossible to cope with this until the law provides a minimum penalty for the offence. In one case of the kind it was proved that the breast of a dam was cut, and that the contents ran into the river killing an enormous number of fish. The magistrates who heard the case convicted and inflicted a fine of *sixpence*. We have referred to the necessity for legislation in connection with this, and with the question of expenses of Close Season inquiries, and with other matters in many of our previous Reports, and in other communications made to your Excellency; and we beg to express the hope that an opportunity will soon be sought for giving effect to our views.

In regard to offences generally against the Fishery Laws, we are glad to say that they have diminished. This is owing to the vigilance of the Royal Irish Constabulary, and the better supervision of water bailiffs in some districts. To the assistance given by the Fishmongers' Company of London, and their able and energetic officers, is due the fact that poachers are finding it difficult to obtain a market for fish caught in close time.

Computing this year's take of salmon, at the Liverpool market price, viz.:—1s. 1d. per lb., the gross value of the exported fish to the nine principal English markets would be about £452,440. The similar export of 1896, although greater by 5,658 boxes, only realized (calculated also at the Liverpool price for that year) £383,391.

With few exceptions, the reports from the Boards of Conservators show that the quantity of breeding fish on the spawning beds was this season considerably greater than last.

In a case (*Hosford v. Devine*) brought at the instance of the Fishmongers' Company of London, but in the name of the Clerk to the Limerick Board of Conservators, it was decided by the Queen's Bench Division of the High Court of Justice, on

the 10th November, 1897, that Justices at Petty Sessions have power, under the Fishery Acts, 5-6 Vic., c. 106, sec. 94, and 13-14 Vic., c. 88, sec. 54, notwithstanding the general provision of sec. 22 of the Petty Sessions (Ireland) Act, 14-15 Vic., c. 93, to award to the successful party in fishery cases decided by them, such costs, charges, and expenses as they shall think fit.

The number of rod licences issued was 2,654 compared with 2,649 in 1896. As to engines used in the tidal waters by fishermen who fish on common law rights, the number of draft net licences issued was 875 a decrease of 66 on the previous year; and drift nets 425, also showing a decrease of 1.\*

The total amount received by Boards of Conservators for licences in 1897 was £10,525. The total ten per cent. rate collected on the poor law valuations of fisheries was £1,064 8s. Fines, and the sale of forfeited engines, produced £746 0s. 9½d. and subscriptions came to £1,203 17s. 11d. The grand total was £13,539 6s. 8½d. as compared with £14,288 14s. 8d. in 1896.\*

We have received many interesting reports on the subject of the artificial propagation of salmon in Ireland, which we give *in extenso*.

Abstracts of Accounts of monies received and disbursed by Boards of Conservators will be found in Appendix No. 32, page 169; the substance of Salmon Fishery By-Laws at present in force in Appendix No. 24, page 130; and the dates of the existing Close Seasons in Appendix No. 25, page 152.

### *Artificial Propagation—Reports.*

We have received the following reports of the operations carried on at the several Hatcheries at work during the season of 1897 :—

#### WEXFORD DISTRICT.

“ Newtownbarry,

“ March 14th, 1898.

“ The Secretary,

“ Office of Irish Fisheries.

“ SIR, —I am requested by Mr. Hall-Dare to send you a short report of the operations at the Salmon Hatchery here.

“ During the close season of 1897 and 1898 we caught 12 male and 22 female fish, from which we took about 200,000 ova for the hatchery. We also got 10,000 Boyne ‘ova’ from Mr. FitzHerbert’s hatchery at Blackcastle. The ‘ova’ are now all hatched out, and there are at present over 190,000 salmon fry in the hatchery and ponds, also a few thousand Loch Leven trout fry from the Solway Fishery, all of which are doing well.

“ I am, Sir,

“ Yours obediently,

“ JOHN SIM.”

" DEAR SIR,—This being the first season that the Inistioge Hatchery has been started it is early yet to give any information as to what must so far be considered as only an experiment. During the close season a certain amount of 'ova' was obtained, which so far appears healthy.

" Yours faithfully,

" EDWARD C. HAMILTON.

Ripe, or nearly so, taken in nets and put into hatchery, 4; average 10 lbs. each.	
Laid down, from 31 female fish averaging 10 lbs. each, 282,000 eggs.	

" The season was rather unfavourable as far as the capture of spawning fish was concerned, the river being for many weeks far too high to allow of the hatch or nets being worked in a satisfactory manner. However, the fish captured were in all cases healthy, and up to the present date the results of our operations have been most successful, very few deaths having taken place, the number being far below that of previous years. This improvement we attribute to a larger and improved water filtration, as well as to a more careful selection of spawning fish.

" A good run of spring fish was noticed in December, particularly on 27th, when 19 very bright fish were taken in the hatch.

KENMARE DISTRICT.

REPORT ON ARTIFICIAL PROPAGATION OF SALMON, received from  
R. M'CLURE, Esq., J.P., of Glenhazel, Kenmare.

The process which has been carried out on the Kerry Blackwater, the property of the Mahony Estate, during the past twenty-eight years has been followed with the same successful results this year.

About 100,000 ova have been hatched out in a series of boxes placed

close to the public road in a central position, near the river, where breeding fish are most easily procured. I venture again to repeat the simple and inexpensive arrangement which has been found so successful. A series of boxes six feet long, eighteen inches wide, and nine inches high, are placed end to end longitudinally. These are filled with clean river gravel to within about three inches of the top, the boxes are placed like flights of steps, each at a level three inches lower than the one above, and the water supply flows, roughly filtered, from a small reservoir at the highest level through an inch pipe into the highest box and thence down through the others; it is conducted from one box to the next by a lip of lead.

This has proved a very remarkable year in artificial propagation, for the ova have been hatched out in thirty days less than the usual time. This is no doubt owing to the extraordinary mildness of the month of January.

It seems a pity that the process of artificial propagation of salmon and trout is not more largely adopted. The lakes and rivers of our country might be plentifully stocked with the finny tribe, which would render them infinitely more valuable, and our country more attractive to the monied classes who passionately pursue the sport of angling.

A hatchery on a large scale has been successfully established by Messrs. Power and Dodd near Killorglin. One on a small scale has been also this year established on the shore of Caragh Lake, near the Southern Hotel, in which both Lough Leven trout and salmon imported from Scotland have been batched.

It is hopeful to see indications of the process extending. One would like to see the means placed by the Government at the disposal of the able and painstaking Fishery Inspectors to encourage by grant or loans the development of the Irish Fisheries. Their duties seem to be now limited to measures to prevent wholesale destruction, but something more is necessary to develop our Irish fisheries.

Poaching is in many districts extensively practised with impunity; while every effort should be made to terminate this abuse, artificial propagation should be promoted by subsidies from Government sources.

#### KILLARNEY DISTRICT.

“ Killorglin,

“ 9th March, 1898.

“ SIR,—The Salmon hatchery at Dunmanihean on the River Laune, about one mile above Killorglin, was started in November, 1897.

“ The water supply is obtained from a spring the temperature of which is nearly constant at 50° the year round, and after being filtered through coarse gravel is discharged into the hatching-boxes through lead pipes.

“ Forty-one boxes, 6 feet long by 18 inches wide and 9 inches deep, are laid in three parallel rows, the boxes in each row having a fall of about an inch from one to the other, the end box in each row is empty and receives the little fish as they mature and drop down from box to box.

“ The boxes are filled to about half their depth with washed river gravel and on this the ova are laid.

“ It is estimated that each box contains about 5,000 ova.

“ The percentage of unfertile eggs has been very small, in several

boxes the loss did not amount to one egg per day, and after the fry had hatched out the death rate was quite insignificant.

"Out of the entire number only two misshapen fry were observed.

"The bulk of the ova was taken from Lanne fish. Proprietors on two other Irish rivers contributed to the stock; 10,000 were got from the Rhine and 10,000 from the Weser.

"The first ova were laid down on December 2nd, these hatched out on 13th January, 42 days after they had been stripped from the fish; and the resulting fry were distributed between the Cottoner's River, the Gweestin, and other tributaries of the Lanne, between the 1st and 9th of March.

"The entire spawning season, 1897-98, was a very mild one; the average temperature of the air during February, taken at 8 a.m. was 41°.

"Male fish seemed greatly to preponderate on all the streams visited, the proportion to roe fish being roughly as 12 is to 1.

"A gentleman of much experience in artificial fish-propagation, to whom we are greatly indebted for help, recently pronounced our attempt 'as completely successful as anything of the sort which he had ever seen.'

"DEAR SIR,—Replying to yours of 7th inst., I beg to inform you that we have recently erected a small hatchery in our own grounds at Caragh Lake, into which we placed 20,000 Lock Leven trout ova, and 5,000 salmon ova. These have been hatched out, and are doing remarkably well, and I don't think the failures have amounted to 5 per cent. in either case.

"I fully anticipate that our enterprise in this direction will materially improve the lake and river angling.

*Lower Costello Fishery.*

"DEAR SIR,—It is difficult for me to give the Inspectors of Irish Fisheries an interesting report about my hatchery. I only breed *sea trout* not salmon, and although I have turned out for three years some 800,000 fry each year, there has been no difficulty excepting in *securing* and *milking* a sufficient number of trout. I find the great

majority of sea trout don't spawn in the streams as usually supposed, but on the banks and sides of the *Lake*. The spawn is wonderfully hardy, and I get hatched 95 per cent. I guess. This present year, being the fourth year, will be the interesting one as we should feel the benefit in the angling. I may add my whole initial expense, including building house, blasting rocks for long fall of water, and setting up 50 boxes was £75 only, and now it costs me nothing extra. What I hope to tell you of is the result (if any), which would be this summer at earliest.

"Yours faithfully,

"W. LAING."

#### SLIGO DISTRICT.

"Markree Castle, Collooney,  
"10th March, 1898.

"DEAR SIR.—In reply to your request I have much pleasure in sending a short report on the artificial propagation of salmon at my hatchery, Ballisodare, for the information of the Inspectors of Irish Fisheries.

"It is perhaps a little too early in the season to state fully the results, as comparatively few of the ova have hatched out.

"My stock of ova consisted of between 40,000 and 50,000, from my own river. These are only now beginning to hatch out.

"Two consignments, an early and late, of 10,000 each from the Weser River, and which were supplied by Mr. S. Faffi, from near Osnabruck. They were beautifully packed, and arrived in splendid condition. The ova first received are all out, and are a fine healthy lot of alevins.

"I had about 7,000 Scotch ova. They have hatched out and are doing well.

"I also purchased 10,000 ova from France, but they were kept too long, and my manager estimates that at least 20 per cent. hatched out, and, of course, died on the journey. Those that escaped destruction on the way over are now coming out, and appear healthy.

"There is no greater mistake in my opinion than keeping ova too long. The sooner they are sent away when they are in a condition to travel the better. They bear the journey as well for one thing, and I consider it a great point that the ova should get accustomed to the temperature of their new home.

"The manager could not spare me any ova from Ballyshannon this season, as he ran rather short himself, and I did not order any from the Rhine.

"I must confess that I am somewhat disappointed with the results of artificial breeding.

"I think I have improved the appearance and quality of my salmon, but I have not increased the supply, which appears to depend on some cause up to the present unknown, and in my opinion nothing but a careful study of the life history of both smolts and salmon in the sea will clear up the mystery.

"None of the causes which are supposed to explain the falling off in the supply of salmon in England and Scotland will explain the growing scarcity of fish in Ireland—viz., drainage, pollution, or over-netting. Referring only to Ballisodare River, though I believe it applies to other rivers on this coast, last season was the worst but one other, and yet great numbers of smolts were observed going down to the sea. They did not return as grilse. The coast fisheries also were very bad, as the

salmon never came near the shore. I trust, therefore, that if my experience is the same at other fisheries, the Inspectors of Fisheries will impress upon the Government the urgent necessity of providing means to study the habits of salmon in the sea.

"I remain, dear Sir,

"Yours very faithfully,

"EDWARD H. COOPER.

"DEAR SIR,—In Erne Hatchery at Cliff there was 80,000 ova laid down; first lot on December 16th, 1897; first out, February 28th, 1898; 74 days hatching; about 20,000 still to hatch out; will be out about 12th; loss about 10% mostly when coming to life. Salmon were not obtainable late in year, as there was virtually no grilse fishing, and early floods run all fish early into Lough Erne.

Report of Salmon Hatchery at Glenties—Season of 1897-98.

We spawned altogether 54 fish, averaging about 6,000 ova a piece. Of these we retained for the Omea River about 264,000, sending 60,000 ova to the Rosses to attempt the stocking of certain lakes in that district, to which we also sent ova last year.

Our first fish was spawned on the 18th of November, our last on the 8th of December, and, owing to the high temperature of the water during the winter, hatching took place early, and most of our alevins are now in the nursery ponds.

The only matter of public interest attaching to this Hatchery is the successful use of the ordinary river water (decidedly peaty) passed in the first instance through a gravel filter, and afterwards through a series of flannel screens. The eggs get dirty, but we are able when once they are eyed to wash them clean again without injury or much trouble.

Artificial salmon hatchery at Newtownstewart, on the River Mourne, principal tributary of the Foyle.

"The first salmon artificially spawned this season was on 20th November, 1897, and spawning was continued nearly every day till 7th January, 1898, when hatchery was fairly stocked, having about 815,000 ova taken from 154 spawners.

"The weather up till about 8th February was exceptionally mild, and the water temperature never fell below 45°, consequently hatching was very rapid, not occupying longer than 70 to 80 days. Almost all are now hatched and doing very well. About 80 of last year's young were kept in hatching house last summer and autumn, and are now in a large tank, and thriving well. They have been supplied with various kinds of food, such as ox liver, &c., but they much prefer land worms cut up fine.

"GENTLEMEN.—Owing to the high floods in November and December last, there was great difficulty in getting salmon for spawning purposes, and it was impossible to get the requisite number for stocking the hatchery as it should be done, but we laid down 500,000 ova, which have done well, at this date they are nearly all hatched, and very healthy.

"Only for the permission given by you and the Board of Conservators to stop the fish passes on Mr. Chadwick's weir, there would have been scarcely any ova procured.

## POLLEN FISHERIES

*General Observations.*

There was a very decided increase in the amount of pollen captured in Lough Neagh during 1897 as compared with the previous year. There were 396½ tons exported, being 140 tons more than in 1896. At an average price of £16 a ton, the value of the export would be £6,344, an increase of £2,248 on the previous year's export.

Licences were issued in 1897 for 89 trammel and 148 draft nets for pollen, producing £311. It would require about 474 men to work these engines.

In our last Report we gave details showing the results of examinations of pollen made with the object of ascertaining the condition of fish under and about the minimum size (8 inches) that can be legally captured.

We continue these details in respect of the examinations made during the close season 1897-8.

EXAMINATION OF POLLEN in LOUGH NEAGH during Close Season,  
1897-98.

"SIR,—In accordance with your letter of instructions, and the enclosed letter from the Inspectors of Irish Fisheries, I made examinations of pollen in Lough Neagh during the past close season.

"On the 18th November, I employed three fishermen. We first fished the hard bottom near the shore in Antrim Bay, but got no fish of any kind. We then went out to the soft bottom about a mile from the shore and caught 94 pollen—45 female and 49 male. Thirty-nine of these were under 8 inches. The ova in the larger fish, that is to say the fish over 8 inches, was ripe and ready for spawning, but the ova in the lesser fish was small and would not come to maturity to next season. We caught a number of fish about 5 inches. In these there was no ova, only enough to distinguish their sex. Weather very stormy and fish scattered and not plentiful.

"On 14th December I seized a trammel net in which there were 45 pollen, of these 21 were male and 24 female—19 were under 8 inches. The larger fish had all partly spawned, but the ova in the smaller fish was small and not ripe—would not spawn this season.

"There is a small yellow eel known to the fishermen as the 'Ramper eel.' It is very severe on the pollen in the spawning season. Most of these pollen were bitten by these and some of the eels still sticking to the pollen. Weather very stormy, and heavy floods from all the rivers,—the pollen spawn beds must suffer from its effects.

"On 12th January I examined 38 pollen—of those there were 24 male and 14 female—12 of these were under 8 inches. All the larger fish had spawned, but those under 8 inches had not spawned, nor would they have spawned this season. I am clearly of opinion that pollen do not spawn until they are coming three year old.

"Owing to the very stormy weather which continued during the pollen

close season further examinations were impossible. I may also state pollen can only be caught in large quantities at night during the winter season.

## INQUIRIES.

Inquiries were held by Mr. Hornsby and Mr. Roche at Kinsale and Bandon on the 7th and 9th January into the following matters, namely:—

An application to prohibit the use of sprat nets in the Bandon river.

An application for inquiry into the system of netting pursued in the tidal portion of the same river, and in Kinsale Harbour.

The state of the fisheries generally, with the view of making such By-laws, Rules, Orders, and Regulations, as to them shall seem expedient for the more effectual government, management, protection, and improvement of the fisheries in said No. 5, or Cork district (Bandon division).

As a result we made the following three By-laws:—

"It is hereby prohibited to use any sprat net in that part of the River Bandon situated above the Western or Iron Bridge at Kinsale.

"It is hereby prohibited to use any sprat net during the annual and weekly close seasons for salmon and trout in that part of the River Bandon, inside the defined mouth thereof, in which the use of sprat nets is not otherwise prohibited.

"It is hereby prohibited to use any net of greater length than 75 fathoms for the capture of salmon and trout in that part of the River Bandon and its tributaries situated between a line drawn across the said river at right angles with the river's course from the stream on the east side of said river, dividing the townlands of Coolmoreen and Skanagore, to the stream on the opposite shore dividing the townlands of Dromkeen and Knockroe and the mouth of the said River Bandon, as now defined under the Acts relating to the salmon fisheries of Ireland."

The first two are in force, but the third was not approved of.

An inquiry was held on the 12th January by Mr. Hornsby and Mr. Roche, at Cork, into an application for By-laws:—

"1. Prohibiting to beat the water, or to throw stones or other missiles therein, for the purpose of driving fish close in to the banks of any river within the No. 5, or Cork District.

"2. Prohibiting to have in possession, for the purpose of taking fish or with the intent to take fish, between sunrise and sunset, at any season of the year, in or on the banks of the upper or fresh water portions of all rivers and their tributaries, in the No. 5, or Cork District, or in or on mill dams or weirs on said portions of said rivers, any spear, lyster, strokehaul, gaff, or any part or portion of a gaff (except a gaff for the purpose of being used solely as auxiliary to fishing for salmon legally with single rod and line.

"3. The state of the fisheries generally."

As a result we made By-laws of the nature indicated in Nos. 1 and 2 above. They are now in force.

An inquiry was held by Mr. Hornsby and Mr. Roche, at Ballycotton, on the 14th January, into the fisheries of Ballycotton Bay (Co. Cork), with the view of ascertaining whether or not it was necessary to prohibit steam or other trawling in that Bay, either partially or wholly. We decided that it was necessary to close the Bay to steam trawling, and gave effect to our views in a By-law, dated 10th July, 1897, dealing with an area from Ballycotton to Hook Head. The terms of this By-law appear later on (see p. 32). It has been approved of and is in force.

An inquiry was held by Mr. Hornsby, Mr. Green, and Mr. Roche, at Ballycotton, on the 18th January, into an application to repeal the following By-law, dated 13th April, 1889:—

"Whereas at an inquiry held by us, the Inspectors of Irish Fisheries, at Ballycotton, on the 3rd day of April, 1889, it was proved to our satisfaction, and it is our opinion, that the use of trammel nets below or outside of low mark of spring tides in Ballycotton Bay, County Cork, may be authorized during the day-time without injury to the fisheries. Now therefore, We, the Inspectors of Irish Fisheries, acting under the authority of the above-named Acts, do make and ordain this By-law, by which it is permitted, and it is hereby permitted, to use trammel nets for the capture of sea fish in any part of Ballycotton Bay, in the county of Cork, below or outside of low mark of spring tides between sunrise and sunset."

As a result we repealed said By-law, and made the following, which is now in force:—

"We do hereby permit the use of trammel nets for the capture of sea fish between sunrise and sunset in that part of Ballycotton Bay outside an imaginary line drawn one-quarter of a mile from and parallel to low water mark of ordinary spring tides, and inside an imaginary line drawn from Knockadoon Head to the lighthouse on Ballycotton Island and thence to Ballycotton Pier."

An inquiry was held by Mr. Green and Mr. Roche at Ardmore, County Waterford, on the 20th January, into an application for a By-law prohibiting the use of drift nets in Ardmore Bay, within or to the north-west of an imaginary line from Ardmore Head to Mine Head. As a result we made a By-law in the terms of the application, but it was not approved of on the ground that it favoured one class of fishermen at the expense of others.

The fishermen of Ardmore afterwards submitted to Your Excellency a memorial praying that regulations might be made for the protection of the mode of fishing with moored nets, in the Bay. Mr. Hornsby, Mr. Green, and Mr. Roche held, on the 29th October last, a further inquiry into the specific question whether the use of drift nets was injurious to the fisheries of the Bay in general. We came to the conclusion that it was, and submitted another By-law (practically similar to the rejected one) to Your Excellency in Council, giving our reasons, *in extenso*, for doing so. This By-law has been approved of.

Inquiries were held by Mr. Hornsby and Mr. Roche, at Sneem

and Kenmare on the 3rd and 5th February, into complaints that were made of the injurious effects of trawling in that part of Kenmare Bay in which trawling was then allowed, and of the injury done to the fishing gear of other fishermen by trawlers in said part of said Bay. As a result we made the following By-law which was not approved of because of the provision therein with regard to steam yachts not fishing for sale :—

"It is hereby prohibited, to use from any Steamer or Steamship, or Vessel propelled by steam, the method of fishing known as beam trawling or other trawling in Kenmare Bay, within imaginary lines from Hogs Head to the outermost point of Scariff Island, in the County of Kerry, thence to Dursey Head (on Dursey Island), and thence to Crow Head, in the County of Cork—*provided always that in the case of Steam Yachts this prohibition shall only apply when they are fishing for sale.*"

We therefore submitted a new By-law, dated 5th July, 1897, omitting this provision. It has been since approved of.

Inquiries were held by Mr. Green and Mr. Roche, at Galway and Tuam on the 20th and 22nd February, into the state of the fisheries in the upper or fresh water portions of the rivers and their tributaries, in the eastern portion of the Galway District. There was not sufficient evidence produced to justify us in making any change in the By-laws already in existence, or to submit new ones.

An inquiry was held by Mr. Green and Mr. Roche, at Buttevant, on the 2nd March, into the practice of shooting fish in the Awbeg river. As a result we made a By-law prohibiting the practice, which By-law is now in force.

An inquiry was held by Mr. Hornsby and Mr. Roche, at Bantry, on the 4th March, into an application to define the mouth of the River Durrus, in the County of Cork. As a result we made an Order defining—

"The mouth of the Four Mile Water or Durrus river to be a straight line, drawn across said river in a north-westerly direction from the old Store on the southern side of said river in the Townland of Murreagh, to the point known as Hetty's Rock, on the northern side of said river.

"And further defining the points of the mouth of the said Four Mile Water or Durrus River, from which distances are to be measured under the Fisheries Acts."

This Order is now in force.

Inquiries were held by Mr. Hornsby, Mr. Green, and Mr. Roche at Bantry and Castletownbere on the 6th and 9th March, into the operation of the following By-laws dated 27th August, 1887, and 4th June, 1894 :—

"Whereas at inquiries held by us, the Inspectors of Irish Fisheries, at Bantry, on the 5th day of November, 1886, and at Castletown-Berehaven on the 8th day of November, 1886, it was proved to our satisfaction, and it is our opinion, that the use of trammel nets in

Bantry Bay, County Cork, may be authorized during the day-time without injury to the fisheries. Now, therefore, We, the Inspectors of Irish Fisheries, acting under the authority of the above-named Acts, do make and ordain this By-law, authorizing the use of trammel nets in Bantry Bay, in the County of Cork, as follows, viz. :—

"During the months of October, November, December, January, February, and March, in each year, between sunrise and the hour of ten o'clock in the forenoon, and between the hour of three o'clock in the afternoon and sunset; and during the months of April, May, June, July, August, and September, in each year, between sunrise and the hour of seven o'clock in the forenoon, and between the hour of five o'clock in the afternoon and sunset."

"Dated at the Office of Irish Fisheries,

"Dublin Castle, this 27th day of August, 1887."

"Whereas, We, the Inspectors of Irish Fisheries, held in the month of May, 1894, an inquiry into the subject of trawling in Bantry Bay.

"And whereas, having considered the evidence taken thereat, We deem it necessary for the protection and development of the fisheries, to restrict trawling in said bay.

"Now We, acting in pursuance of the powers and authorities in us vested by the above recited Acts, do hereby repeal and rescind the By-laws relating to trawling in Bantry Bay, dated respectively 27th March, 1858, and 11th September, 1861, and the same are hereby repealed and rescinded accordingly.

"And in pursuance of the powers and authorities aforesaid we do hereby make the following By-laws :—

"1. The method of fishing known as trawling is hereby prohibited at all times in that part of Bantry Bay comprised within a straight line drawn from Crowdy Point, in the Townland of Bocornagh, Parish of Kilcaskan, and Barony of Bear, to Carrigakye Rock, off the Townland of Arlaturrishmore, in the Barony of Bantry, and from Carrigakye Rock to Reenavanny Point in the Townland of Reenavanny, Parish of Kilmocomoge, and Barony of Bantry, on the north shore of Whiddy Island, and also inside or to the east of the Bar between Whiddy Island and the mainland.

"2. The method of fishing known as trawling is hereby prohibited at all times in that part of Bantry Bay situated between the following imaginary lines :—

"(a.) A straight line from Piper Point to Na-glos Point.

"(b.) A straight line from the Perch (at the entrance to Castletown Harbour), to the point of land on Bear Island, adjacent to Sheep Islands.

"3. The method of fishing known as trawling is hereby prohibited between sunset and sunrise in that part of Bantry Bay situated inside or to the north-east of an imaginary line from Sheep's Head on the south, to Doonbeg Head on Bear Island, and continued by a line from the point of land on Bear Island, adjacent to Sheep Islands, to the Perch (at the entrance to Castletown Harbour.)"

"Dated at the Irish Fisheries Office,

"Dublin Castle, this 4th day of June, 1894."

We also inquired into the general state of the fisheries in Bantry Bay, with the object of making such By-laws, Rules, and Regulations, as should seem to us expedient for the more effectual government, management, protection, and development of the fisheries in said Bay. As a result we made the following three By-laws, all of which are now in force:—

1. "We do hereby repeal and rescind the third of the said By-laws relating to trawling in Bantry Bay, dated 4th June, 1894.

"And we do hereby make the following By-law:—

"The method of fishing known as trawling is hereby prohibited between sunset and ten of the clock in the forenoon of the following day in that part of Bantry Bay situated inside or to the north-east of an imaginary line from Sheep's Head on the south, to Doonbeg Head on Bear Island, and continued by a line from the point of land on Bear Island, adjacent to Sheep Islands, to the Perch (at the entrance to Castletown Harbour)."

2. "The method of fishing known as trawling is hereby prohibited between ten of the clock in the forenoon, and sunset, in that part of Bantry Bay situated between the following imaginary lines:—

"(a.) A straight line from Coarraid Point to Palmer Point.

"(b.) A straight line from Bull Island to Roancarrig Island and thence to Lonehort Point."

3. "It is hereby prohibited, to use from any steamer or steamship, or vessel propelled by steam, of more than twenty tons net register, the method of fishing known as beam trawling or other trawling, in Bantry Bay inside an imaginary line from Crow Head to Sheep's Head, both in the County of Cork."

An inquiry was held by Mr. Green and Mr. Roche at Athlone on the 30th and 31st March into the alleged diminution of fish in Lough Ree, and the River Shannon in the neighbourhood of Athlone, and into the prevalence of poaching, and wholesale destruction of small fish for bait; also into the general state of the fisheries.

Having considered the evidence submitted, we decided that if the existing law could be enforced it is sufficient for the protection of these fisheries.

We also informed the Conservators of our views as to the course they should pursue in endeavouring to enforce the law.

An inquiry was held by Mr. Green and Mr. Roche, at Achill Sound on the 2nd April, with the view of ascertaining whether or not it was necessary to prohibit steam or other trawling in Keem Bay and off the shores of Achill Island and the neighbourhood, either partially or wholly. As a result we made the following By-law which is now in force:—

"The method of fishing known as trawling is hereby prohibited off that part of the south shore of Achill Island (County of Mayo), lying inside or to the northward of an imaginary line from Achill Head to Docega Head."

Inquiries were held by Mr. Hornsby and Mr. Roche, at Waterford and Dunmore East on the 8th and 9th April, into the operation of the By-laws dated 15th December, 1873, and 19th September, 1890, which were as follow :—

"Whereas by a By-law bearing date the 18th day of June, One thousand eight hundred and sixty, the use of trawl nets, of and belonging to and used from boats or vessels exceeding five tons measurement, was prohibited at all times within that part of the Harbour of Waterford lying to the northward of a straight line drawn from Creden Head, in the County of Waterford, to Temple Church, in the County of Wexford.

"Now, We, the Inspectors of Irish Fisheries, in pursuance of the powers and authorities in us vested by the Fisheries (Ireland) Act, 1869, do hereby repeal and rescind the above recited By-law, and the same is repealed and rescinded accordingly; and in lieu thereof, we do make and substitute the following By-law :—

"The use of trawl nets of and belonging to and used from vessels or boats exceeding ten tons measurement is hereby prohibited within that part of the Harbour of Waterford lying to the north ward of a line drawn from Gaultier Cottage, in the County of Waterford, to Broomhill Point, in the County of Wexford.

*"Dated at the Office of Irish Fisheries,  
this 15th day of December, 1873."*

"We, the Inspectors of Irish Fisheries, in pursuance of the powers and authorities in us vested by the "Steam Trawling (Ireland) Act, 1889," do make and ordain the following By-law, by which it is prohibited, and it is hereby prohibited to use from any steamer or steamship, or vessel propelled by steam, the method of fishing known as trawling in that part of Waterford Harbour lying to the northward of an imaginary line drawn from Gaultier Cottage in the County of Waterford, to Broomhill Point in the County of Wexford. *Provided always that in the case of steam yachts this prohibition shall only apply when they are fishing for sale.*

*"Dated at the Irish Fisheries Office,  
Dublin Castle, this 19th day of December, 1890."*

We also inquired into the question of trawling generally, and the state of the fisheries in Waterford Harbour. As a result we repealed the By-law of 19th December, 1890, and made the following By-law, dated 10th July, 1897, which includes an area extending from Ballycotton Pier (Co. Cork) to Hook Head (Co. Wexford):—

"It is hereby prohibited to use from any steamer or steamship, or vessel propelled by steam, the method of fishing known as beam trawling or other trawling off the coast of the Counties of Cork, Waterford, and Wexford, situated within an imaginary line from Ballycotton Pier to the Light-house on Ballycotton Island, and thence in an easterly direction to Hook Head, in the County of Wexford, and also within the distance of three miles seaward of said imaginary line."

This By-law is now in force.

An inquiry was held by Mr. Hornsby and Mr. Roche at Dunganarvan on the 12th April, into an application made to us to

exercise the powers given to us by the Steam Trawling (Ireland) Act, 1889 (52 and 53 Vic., cap. 74) and prohibit steam trawling off the County Waterford coast in the neighbourhood of Ring. This area is also included in the foregoing By-law dated 10th July, 1897.

Inquiries were held by Mr. Green and Mr. Roche at Ballyvaughan and Galway on the 4th and 6th May, into an application received by us, to prohibit trawling within a line from Spiddal (Co. Galway) to Blackhead (Co. Clare), between 1st November in each year and 1st May in the year following.

We did not make the By-law asked for, as the line fishermen used almost the whole ground available for trawling; and to have granted their request would have very seriously hampered one, important branch of the local fishing industry for the protection of another.

An inquiry was held by Mr. Hornsby, Mr. Green, and Mr. Roche at Killarney on the 26th May, into an application for a By-law prohibiting the use of cross lines on Killarney Lakes. We submitted to Your Excellency in Council a By-law in the terms of the notice. It has since been approved of.

An inquiry was held by Mr. Hornsby and Mr. Roche at Bundoran on the 16th June, into the alleged decrease of salmon in the River Drowes or Bundrowes; into the obstruction to the passage of fish; and the mode of fishing pursued in said river, with the view of making such By-laws, Rules, Orders, or Regulations as should seem expedient for the more effectual government, management, protection, and improvement of the fisheries of said River. We suggested an amicable arrangement amongst the parties interested in this inquiry under which the River was to be cleaned out, and certain stone-walls were to be staunched, in order to confine the water to the channel, and to prevent the formation of certain pools which acted as fish-traps.

Inquiries were held by Mr. Hornsby, Mr. Green, and Mr. Roche at Mulranny and Westport on the 21st and 23rd June, into the fisheries of Clew Bay, with the view of ascertaining whether or not it was necessary to further prohibit the system of fishing known as trawling in that Bay. As a result we made on the 26th July the following By-law, which was not, however, approved of, in consequence of the clause therein excepting trawlers of less than twenty tons register from its provisions:—

"It is hereby prohibited to use from any steamer or steamship, or vessel propelled by steam, of twenty tons register and over, the method of fishing known as beam-trawling, or other trawling in Clew Bay, County of Mayo, inside or to the eastward of imaginary lines drawn from Achilbeg, in the County of Mayo, to the lighthouse on Clare Island; and from Kinnacorra Point, in Clare Island, to Roanagh Head, in the County of Mayo."

We re-submitted a By-law, dated 18th November, 1897, (leaving out the clause objected to) which has been approved of.

An inquiry was held by Mr. Green and Mr. Roche at Ballinasloe on the 24th June, into (1) the desirability of granting an exemption under Section 4 of the Act 32 Vic. c. 9, from the necessity (under the 76th Section of the Act 5 and 6 Vic. cap. 106), of erecting gratings at the mills belonging to Mr. P. J. O'Farrell, at Ballinasloe, on the River Suck. (2) The facilities existing for the safe passage of fry at said mills. As a result we granted on 2nd July an exemption in regard to the head race.

Inquiries were held at Rathkeale and Askeaton on the 12th and 14th July, by Mr. Hornsby and Mr. Green, into the following applications:—(1.) To hold an inquiry as to the construction of the Round Weir at Askeaton, and the obstruction caused by it, and all other obstructions to the free ingress of salmon and sea-trout to the upper portion of the River Deel. (2.) To pass a By-law prohibiting the use of worms as a bait when fishing by anglers not having a salmon licence. (3.) To inquire into the state of the salmon fishing in said river generally. The application for No. 2 was abandoned in court. As a result we approved of an alteration in the fish pass at the Round Weir near Askeaton, and requested the proprietor to facilitate the carrying out thereof; but up to the present time without success. We also made the accompanying By-laws, which, however, were not approved of:—

"(1.) It is hereby prohibited to fish by any means whatsoever within a space of thirty yards below the lowest barrier known as George's Weir, near Askeaton, on the River Deel.

"(2.) All modes of fishing, save fly-fishing, are hereby prohibited within twenty yards of the barrier known as the Round Weir, near Askeaton, on the said River Deel."

An inquiry was held at Limavady on the 20th July by Mr. Hornsby and Mr. Green with the object of ascertaining whether the Weir erected by Mr. J. E. Ritter on the River Roe, in the Townland of Largy, county Londonderry, and the mill works and water courses appurtenant thereto, complied with the law. As a result the owner agreed to make certain alterations in the premises with the object of facilitating the passage of fish and protecting fry.

Inquiries were held at Buncrana and Rathmullan on the 21st and 23rd July by Mr. Hornsby and Mr. Green into the alleged injurious effects of Otter Trawling in Lough Swilly. The matter was further inquired into by Mr. Hornsby, Mr. Green, and Mr. Roche at Londonderry on the 14th September.

As a result we made the following By-law, dated 3rd November, 1897, which has been approved of:—

"The method of fishing known as trawling is hereby prohibited in that part of Lough Swilly (County of Donegal) lying inside or to the southward of an imaginary line drawn in a westerly direction from Hawk's Nest Point on the Island of Inch to the Bridge over the conjoined Rivers Ballasallagh and Glenalla."

An inquiry was held at Limerick on the 13th July by Mr. Hornsby and Mr. Green into the desirability of granting an exemption under Section 4 of the Act 32 Vic., c. 9, from the necessity (under the 76th Section of the Act 5 and 6 Vic., cap. 106) of erecting gratings at the watercourse carrying water from the River Shannon at New Garden, which belongs to the Mayor, Aldermen, and Burgesses of the City of Limerick. As a result we were unable to grant an exemption.

An inquiry was held by Mr. Hornsby and Mr. Roche at the Courthouse, Kilkenny, on the 30th August into the desirability of granting an exemption under Section 4 of the Act 32 Vic., c. 9, from the necessity (under the 76th Section of the Act 5 and 6 Vic., cap. 106) of erecting gratings at the mills belonging to Mr. Edward Fennessy, at Archersgrove, Kilkenny, on the River Nore. We granted an exemption on the 10th September in respect to the tail race.

An inquiry was held by Mr. Hornsby and Mr. Roche at Tullow on the 1st September into the desirability of granting exemptions under Section 4 of the Act 32 Vic., c. 9, from the necessity (under the 76th Section of the Act 5 and 6 Vic., cap. 106) of erecting gratings at the mills belonging to (1) Mr. James McDonald, at Tullow, on the River Slaney, (2) Mr. Murphy, at Ouragh, near Tullow, on the River Slaney. We granted exemptions on the 10th September in respect to the tail races of both mills.

An inquiry was held by Mr. Hornsby and Mr. Roche at Baltinglass on the 3rd September into the desirability of granting an exemption under Section 4 of the Act 32 Vic., c. 9, from the necessity (under the 76th Section of the Act 5 and 6 Vic., cap. 106) of erecting gratings at the mills belonging to Mr. P. P. Morrin, at Baltinglass, on the River Slaney. As a result we granted on 10th September an exemption for 12 months in respect to the tail race.

An inquiry was held at Wexford on the 6th September by Mr. Hornsby and Mr. Roche into the following matter, namely:—The necessity for a By-law prohibiting to have in possession, for the purpose of taking fish, or with the intent to take fish, between sunrise and sunset, at any season of the year, on or near the banks of the upper or fresh water portions of all rivers and their tributaries, in the Wexford district, or on or near mill dams or weirs on said rivers any spear, lyster, strokehaul, gaff, or any part or portion of a gaff (except a gaff for the purpose of being used solely as auxiliary to angling for salmon legally with rod and line). As a result we made a By-law of the nature indicated, which has been approved of.

An inquiry was held by Mr. Hornsby Mr. Green, and Mr. Roche at Burtonport on the 17th September into an application for a By-law to permit the use of set herring nets between sunrise and sunset off the coast of the county Donegal. We found ourselves unable to comply with the application.

An inquiry was held by Mr. Hornsby, Mr. Green, and Mr.

Roche at Killarney on the 2nd October into an application for a By-law to limit the length of nets used in the Killarney Lakes. On the 16th November a further inquiry was held into this matter, and into an application for a By-law to prohibit net fishing in said Lakes during the months of June and July. The evidence did not justify us in making any By-law.

An inquiry was held by Mr. Hornsby and Mr. Roche at Kenmare on the 5th October into the desirability of granting an exemption under Section 4 of the Act 32 Vic., c. 9, from the necessity (under the 76th Section of the Act 5 and 6 Vic., cap. 106) of erecting gratings at the Finneby mills belonging to Mr. William Lee, on the River Finnehy, and near Kenmare. We granted, on 25th October, an exemption in respect to the head race.

Inquiries were held by Mr. Hornsby, Mr. Green, and Mr. Roche at Portmagee, Caherciveen, and Dingle, on the 7th, 8th, and 12th October, into the fisheries of the territorial waters off the shores of the county of Kerry, between Brandon Head and Lamb Head, and of the Bays and Inlets between said Heads, with the view of ascertaining whether or not it was necessary to prohibit the system of fishing known as trawling therein, or to alter and amend the regulations or restrictions as to trawling at present existing in any of the said waters, or bays, or inlets. As a result we made the following By-laws, dated 13th November, 1897, which have been approved of:—

"1. It is hereby prohibited to use any trawl net in Smerwick Harbour, within or to landwards of an imaginary line from Ballydavid Head to East Sister (both in the county of Kerry); except between the 15th day of May and the 15th day of July in each year, both days inclusive.

"2. It is hereby prohibited to use from any steamer or steamship, or vessel propelled by steam, the method of fishing known as beam trawling or other trawling in Smerwick Harbour within or to landwards of an imaginary line from Ballydavid Head to East Sister (both in the county of Kerry), between the 15th day of May and the 15th day of July in each year, both days inclusive.

"3. It is hereby prohibited to use from any steamer or steamship, or vessel propelled by steam, the method of fishing known as beam trawling or other trawling within or to the landwards of the following imaginary lines, namely:—From Dunmore Head to the Great Blasket Island, and from the most westerly point of the latter to Lemon Rock and thence to Scariff Island, all in the county of Kerry."

An inquiry was held by Mr. Hornsby and Mr. Roche at Skibbereen on the 19th October into the alleged obstruction to the passage of salmon caused by the dam across the River Saivnose (a tributary of the River Ilen), which was erected in connection with the supply of water to the Town of Skibbereen. As a result the Chairman of the Board of Guardians undertook to improve the existing pass, but afterwards the Board decided to remove the weir.

Inquiries were held by Mr. Hornsby and Mr. Roche at Skibbercen, Kinsale, Queenstown, and Youghal on the 19th, 21st, 23rd, and 27th October into the fisheries of the territorial waters off the shores of the county of Cork, between Sheep's Head, on the southern shore of Bantry Bay, and Ballycotton Pier, and of the Bays and Inlets between same, with the view of ascertaining whether or not it was necessary to prohibit the system of fishing known as trawling therein, or to make regulations or restrictions as to trawling in any of the said waters, or bays, or inlets. As a result we made the following By-laws, dated 20th November, 1897, which have been approved of:—

"It is hereby prohibited, to use from any steamer or steamship, or vessel propelled by steam, the method of fishing known as beam trawling or other trawling off that part of the coast of the County of Cork, situated within or landwards of the following imaginary lines, namely:—

"(a) From Sheep's Head to Three Castle Head, both in the County of Cork.

"(b) From Mizen Head in the County of Cork, to the Fastnet Rock; thence to the Stags of Castlehaven; and thence to Galley Head in the County of Cork.

"And it is hereby prohibited to use from any steamer or steamship, or vessel propelled by steam, the method of fishing known as beam trawling or other trawling off that part of the coast of the County of Cork, situated within or to landwards of, and also within a distance of three miles seaward of, the following imaginary line, namely:—

"A line from Galley Head to Seven Heads, thence to the Old Head of Kinsale, and thence to Ballycotton Lighthouse, all in the County of Cork.

An inquiry was held by Mr. Hornsby and Mr. Roche at Cork on the 25th October, into an application for a By-law prohibiting the use of nets known as scourge nets in Cork Harbour during the weekly and annual close seasons. As a result we made the following By-law, dated 3rd January, 1898, which has been approved of:—

"It is hereby prohibited to use any draft net in that part of the River Lee, situated between the Waterworks Weir and an imaginary line drawn from Blackrock Castle to Dunkettle Bridge, during the annual and weekly close seasons for salmon and trout."

Inquiries were held by Mr. Hornsby and Mr. Roche at Killorglin on the 18th November, and at Killarney on the 19th November, into applications for By-laws (1) to prohibit night fishing with nets in the River Laune and its Estuary; (2) to curtail the length of the nets used in the said River and Estuary; (3) to prohibit the shooting of a second net within 200 yards of another until the latter has been beached, and (4) to prohibit the use of a pole in any boat while engaged in fishing. The inquiry was also into the fisheries generally. The evidence produced did not justify the making of any By-law.

Inquiries were held by Mr. Hornsby and Mr. Roche at Mullingar and Longford on the 30th November and 2nd December, into the methods of fishing used in the Westmeath Lakes

and their tributaries, with the view of having By-laws made prohibiting the netting for trout, or other detrimental means of fishing. As a result we made the following By-law which is now in force :—

"It is hereby prohibited to fish with nets (save landing nets used solely as auxiliary to fishing legally with rod and line), in Lough Owel."

Inquiries were held by Mr. Hornsby and Mr. Roche at Kinsale and Bandon on the 14th and 16th December, into applications for By-laws as follow :—

"1st. Prohibiting the use of all nets, except salmon nets and landing nets used as auxiliary to fishing legally with rod and line, in that part of the River Bandon which lies above the Western or Iron Bridge at Kinsale.

"2nd. Prohibiting the use of nets (except landing nets used as auxiliary to fishing legally with rod and line), for the capture of salmon or trout in any part of the said River Bandon, or its tributaries, above a line drawn at right angles to the course of the stream from Shippool Castle to a point on the opposite bank.

"3rd. Prohibiting the use of any net for the capture of salmon or trout of greater length than 450 feet between the mouth of the said River Bandon, as defined, and a straight line drawn from the Quay, known as the Long Quay, to a point on Oak Hill on the opposite side, or such other line that may be decided on; and to prohibit the use of any net for the capture of salmon or trout of greater length than 300 feet above said line.

"4th. Enacting that each and every boat used in salmon and trout fishing shall have marked on each bow, with distinct figures of not less than 6 inches in length, and 1 inch in breadth, a number corresponding with the number on the licence issued for the net used with said boat, and that said numbers shall be painted in white oil colour on a black ground."

As a result we made the following By-laws, which have been submitted for approval :—

"It is hereby prohibited to use any net save salmon nets and landing nets used as auxiliary to fishing legally with rod and line in that part of the River Bandon, situated between lines drawn across the said river, from Ballywilliam Point to Ballyhauder Creek, and from the stream on the east side of the said river, dividing the Townlands of Coolmoreen and Skanagore, to the stream on the opposite shore dividing the Townlands of Dromkeen and Knockree."

"We do make and ordain the following By-laws, Rules and Regulations to be observed by all persons engaged in fishing for or taking salmon or trout in the said Bandon Division of the Cork District :—

"1st. Each and every boat used in salmon and trout fishing shall have marked on each bow with distinct figures of not less than six inches in length and one inch in breadth, a number corresponding with the number on the licence issued for the net used with said boat.

"2nd. The said numbers shall be painted in white oil colour on a black ground.

"3rd. The numbers so placed on boats shall not be effaced, covered, or concealed in any manner whatsoever."

Application No. 3, above referred to, was withdrawn, and No. 2 was postponed to a future occasion.

An inquiry was held by Mr. Hornsby and Mr. Roche at Skibbereen on the 17th December, relative to the length of the seine or draft nets used in the tidal waters of the River Ilan. We made no rule in the case.

Many scientific and other reports have been forwarded to us during the year, and we take this opportunity of thanking those who placed at our disposal the valuable information they contain.

We desire to express in the strongest manner our appreciation of the very valuable assistance in the enforcement of the salmon fisheries laws, rendered by the Inspector-General, Officers, and men of the Royal Irish Constabulary; and of the help given to us by them in investigating numerous matters of detail arising out of our administration of the loan funds. The same observations apply to the Officers, Warrant Officers, and men of Her Majesty's Coast Guard in regard to their cordial co-operation and assistance, in so far as they were permitted by the orders of the Lords Commissioners of the Admiralty.

All of which we beg respectfully to submit to Your Excellency.

## ABSTRACT of RETURNS of Salted and Cured Fish imported into Ireland during the Year 1897.

[*Mano.*—The following return cannot be taken to be complete. It represents such information only as the Inspectors have been able to obtain. For instance, it is well known that a large quantity of dried fish is imported into Belfast, but since 1st August 1894, dried fish have been exempted from coasting regulations, so that no reliable data can now be obtained. A large quantity of cured fish is also imported in steamers carrying mixed cargoes, but particulars are not procurable.]

12	A. R. P. 233 0 0	Acres. 23	No oysters taken up or laid down. Bed has been allowed to rest.
15	96 2 0	2	Beds in a very satisfactory state. About two tons of oystershells have been put down each year for the past five years in order to catch spat. 210,000 small native oysters put down; they will be fit for consumption in two years. On an average 6,000 oysters per week were sold during September, October, November, and December, value about 4s per 1,000. Fairly successful spatting season. About 500,000 French oysters laid down; but the mortality amongst them was most serious. Experiment not encouraging.
19	348 0 0	160	Worked with No. 37.
23	1,779 0 0	160	Bed in a very good state. Was dredged and cleaned, and spat from the fore shore collected and put out. About 35,000 native oysters laid down. 36,000 sold for about £150. A fair fall of spat.
27	236 0 0	10	The beds in Mannin Bay are practically useless. Those at Ardagh have proved to be fairly productive if let rest for two or three years. Some 60,000 French oysters laid down; 20,000 native oysters, which proved good spatting oysters; 20,000 American (Long Island) put down in May last. Fair quantity of spat on beds.
43	150 0 0	150	Beds in good condition. 7,000 oysters have been laid down.
114	201 2 0	50	None laid down. Beds in good order, have been well cleaned. About 6,000 sold, value £21. Fall of spat better than for previous years.
115	810 0 0	39	Beds in good condition. 68,000 native oysters laid down. 45,000 taken off and sold, value £35. Some fall of spat.

49	148 3 0	40	Beds in satisfactory condition. Cleaned by dredging. No oysters laid down. About 200 taken up for private use. The French oysters on the beds have done fairly well. No perceptible fall of spat.
59	54 0 0	20	Beds in fair working order. Has been kept clean. About £250 worth sold, and about £250 worth of native oysters put down. Slight fall of spat.
65	87 0 0	10	Beds in satisfactory condition. 30,000 native oysters laid down. None taken up. No perceptible fall of spat.
86	100 0 0	19	Bed clean and in good order. Has been kept free from mud. About 30,000 American oysters planted. About 30,000 sold. American oysters succeed best on the bed. For year ending 30th April, 1897, there was a very brisk demand, and all that were on the beds were sold and the beds cleared. A much larger number has been planted to meet the expected demand during the coming season.
96	77 0 0	5	Dutch oysters laid down in 1894 did not survive any length of time. Only a small portion of the bed is suitable for breeding purposes.
100	53 0 0	20	Worked with No. 98. Only a few thousand were sold during the season 1896-97. No fall of spat was observed on the east end of the bed, but on the west there was some.

## APPENDIX No. 24.

ABSTRACT of BY-LAWS, ORDERS, &c., in force at date of this Report relating to the SALMON FISHERIES of IRELAND.

Place affected by By-Law, and Date thereof.	Nature of By-Law.
<b>SALMON AND TROUT.</b>	
<b>Dublin District.</b>	
River Liffey, . . . . . (19th Jan., 1865.)	Prohibiting the catching, or attempting to catch, Salmon with any Net of greater length than 350 yards, in that part of the River Liffey which is situated between the Weir known as the Island Bridge Weir and a line drawn due North from Poolbeg Lighthouse.
Between Dalkey Island and Wicklow Head. (15th Oct., 1874.)	Permitting use of Nets with Meshes of one inch from knot to knot for capture of Salmon or Trout between Dalkey Island and Wicklow Head.
Broad Meadow Water and Swords River. (23rd Aug., 1884.)	Prohibiting to have in possession for the purpose of taking fish, or with intent to take fish, at any season of the year, on or near the banks of the Broad Meadow Water and Ward or Swords River, any Spear, Lyster, Strokehaul, or Gaff (except a Gaff for the purpose of being used solely as auxiliary to angling for Salmon legally with Rod and Line).
Whole District, . . . . . (25th Aug., 1893.)	Prohibiting to beat the water, or to throw stones or other missiles therein, for the purpose of driving Fish close in to the Banks of any River within the District.
<b>Wexford District.</b>	
River Slaney, . . . . . (25th March, 1884.)	Prohibiting, during the Close Season for Salmon the use of Nets of any kind whatsoever, between Ferrycurrig Bridge and the Town of Enniscorthy.
River Slaney, . . . . . (13th Aug., 1881.)	Prohibiting the practice of keeping Nets on board Boats between Sunset and Sunrise, during the Annual Close Season for Salmon and Trout, in that part of the River Slaney situated between Ferrycurrig Bridge and the Town of Enniscorthy.
River Slaney, . . . . . (12th Oct., 1882.)	Repealing By-law dated 4th March, 1862, which prohibited the use of nets with meshes of less size than one-and-three-quarter inches from knot to knot, during the open season, in that part of the River Slaney between Ferrycurrig Bridge and Enniscorthy.
River Slaney, . . . . . (25th Dec., 1893.)	Repealing so much of the By-Law dated 12th October, 1882, as permitted the use of Nets with meshes of one-and-a-quarter inches from knot to knot, in the Tidal Waters of the said River Slaney, and in lieu thereof permitting the use of Nets with meshes of one-and-a-half inches from knot to knot (or Six inches to be measured all round each such mesh, such measurements being taken in the clear when the Net is wet), for the capture of salmon or Trout in the Tidal Waters of the said River Slaney, and its Tributaries, during the Open Season for the capture of Salmon and Trout.
River Slaney and Tributaries, (20th April, 1894.)	Prohibiting the use of any Net for the capture of Salmon and Trout, save a Net duly licensed in that behalf, in that part of the River Slaney, situate between Wexford Bridge and Ferrycurrig Bridge, and the Tributaries falling into that portion of the said River Slaney.
River Slaney and Tributaries, from Enniscorthy Bridge to Source, (13th Dec., 1893.)	Prohibiting to beat the water or throw stones or other missiles in that portion of the River Slaney and its tributaries, extending from Enniscorthy Bridge to the source of the River Slaney and its tributaries, for the purpose of driving fish close in to the banks of the said River and said tributaries.
